

What is claimed is

1. A connecting member for a sound generator comprising:

a pair of connecting spring plates;

5 each of the connecting spring plates having a first end connecting portion to be connected to a terminal of a sound generator, and a second end connecting portion to be connected to a circuit for operating the sound generator;

10 a surface of the first end connecting portion being treated so as to be soldered to the terminal of the sound generator; and

a surface of the second end connecting portion being coated with gold by gold plating.

15 2. The connecting member according to claim 1 wherein the surface of the first end connecting portion is coated with gold by gold plating.

3. The connecting member according to claim 1 wherein the surface of the first end connecting portion is coated with a solder by solder plating.

20 4. The connecting member according to claim 1 wherein a portion other than the first and second end connecting portions are coated with nickel by nickel plating.
